NISHI KUMARI

Machine Learning Intern | AI & ML Engineer (Final Year) | Bengal Institute of Technology

Kolkata, India | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Final-year B.Tech student (AI & ML), Bengal Institute of Technology (graduating July 2027). Two-time 1st Place Tech Fest winner with Team Binary Executors. Built production-grade ML projects: NAFLD_XAI — Explainable AI clinical API (SHAP + FastAPI, 80%+ accuracy) — and ParkIn — full-stack AI smart parking with recommendation engine, demand forecasting, ANPR & IoT. Proficient in Python, Scikit-learn, SHAP, NumPy, Pandas, and AWS. Seeking an ML Internship to drive real-world AI impact.

TECHNICAL SKILLS

Languages: Python, Java, C, JavaScript

AI / ML: Machine Learning, Scikit-learn, SHAP (XAI), NumPy, Pandas, Data Analysis, Predictive Modeling, Feature Engineering

Backend & API: FastAPI, Flask, REST API Development, HTML5, CSS3

Cloud & Tools: AWS (Lambda, S3, Serverless), Git, GitHub, Jupyter Notebook, Google Colab, VS Code

Databases & Analytics: Firebase, Supabase, MongoDB, SQL, Google Analytics 4 (GA4), Web Analytics

PROJECTS

ParkIn | AI-Powered Cross-Platform Smart Parking System GitHub

Python, Flask, ML Recommendation Engine, ANPR, IoT (ESP/Arduino), HTML/CSS/JS, Firebase, Supabase, MongoDB | Team: Binary Executors

1st Place, Tech Fest 2025

- Built a full-stack smart parking platform with real-time slot booking, AI-driven recommendations, demand forecasting, ANPR plate detection, and IoT sensor integration — designed for smart city scalability
- Architected a 4-layer system (Presentation, Application, Data, AI) with Flask ML API, Firebase auth, Supabase (backend-as-a-service), MongoDB, and ESP IoT module; won 1st Place (Envision) and 2nd Place (Electronovation – IoT) at BIT Tech Fest 2025

NAFLD_XAI | Explainable AI for Clinical Risk Prediction (Production API) GitHub

Python, Scikit-learn, SHAP (TreeExplainer), FastAPI, Pandas, NumPy, Healthcare AI

- Developed a production-ready ML + FastAPI system achieving 80%+ accuracy for NAFLD risk prediction using clinical patient data
- Integrated SHAP TreeExplainer into the API pipeline to return per-patient, feature-level contribution values — transforming the model from a black box into a clinician-trusted decision-support tool

EDUCATION

Bengal Institute of Technology, Kolkata Aug 2024 – Jul 2027

B.Tech – CSE (Artificial Intelligence & Machine Learning) | Final Year | Expected Graduation: Jul 2027

Coursework: Machine Learning, AI, Data Structures & Algorithms, DBMS, OOP, Statistics for Data Science

Government Women's Polytechnic, Muzaffarpur Dec 2021 – May 2024

Diploma in Computer Science & Engineering

CERTIFICATIONS

Google Analytics 4 (GA4): Become a Web Analytics Specialist Udemy | Aug 2025

ID: UC-c47a49b8-cb87-44ca-baa9-ed320a46462c | GA4, Web Analytics, Audience Analysis, Conversion Tracking

Mastering AWS Serverless: Hands-On with Core AWS Services Udemy | Aug 2025

ID: UC-b8ddea7b-bfec-4638-9f17-4cf499810dee | AWS, Amazon S3, Lambda, API Gateway, Serverless Computing

ACHIEVEMENTS & ACTIVITIES

- Won 1st Place (Envision) and 2nd Place (Electronovation – IoT) at BIT Tech Fest 2025 with ParkIn; also secured 1st Place in Genfusion (Generative AI) with SniffTern AI — as part of Team Binary Executors
- Published 2 production-grade ML projects on GitHub (ParkIn, NAFLD_XAI) and earned 2 Udemy industry certifications — all self-initiated beyond coursework

ADDITIONAL INFORMATION

Currently Learning: Deep Learning, Model Deployment, Advanced SQL, React Native | **Open To:** ML/AI Internships, Hackathons, Open-Source | **Languages:** English, Hindi | **Availability:** Immediate
